

How to offset fee increases:

Recycle. We suggest a “recycling station” near your trash collection. A plastic bag for plastic bottles and jugs, a plastic bag for bottles and steel cans, a plastic bag for aluminum cans, a sturdy box for all mixed papers: cereal boxes, junk mail, magazines, clean paper; a box for newspapers.

Corrugated cardboard, flattened is also a recyclable item. Eliminating these items from your trash will reduce your waste considerably.

Rinsing all containers before storing in your plastic bags will prevent odors and pests.

Compost. Most food waste can be composted. Food waste will make your trash smelly, so eliminate it completely. You cannot compost meat or bones; wrap in a used plastic bag, and put in your trash. If you need more information on starting a compost pile, please call 704-922-7729.

Garbage bags and recycle bags shall be equal in size to get credit for fees.
