

See Appendix A - 6 Sneeze Guard Design And Installation For Elementary, Middle, High School And For Commercial Food Service Establishments.

Grades K-2

TYPICAL BUFFET TABLE

TYPICAL CAFETERIA COUNTER

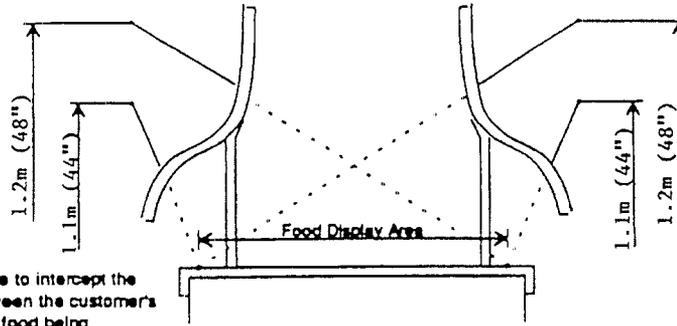

FOOD SHIELDS

Grades 3-5

TYPICAL BUFFET TABLE

customer's average mouth heights on a line perpendicular to the horizontal edge of the buffet table

exposed edges of glass shelves or shields shall have a safety edge of parent material and be trimmed with channels

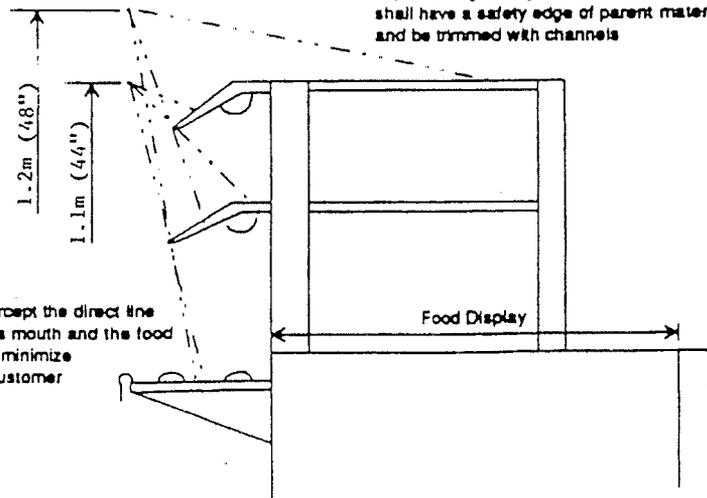

food shields are to intercept the direct line between the customer's mouth and the food being displayed and to minimize contamination by the customer

TYPICAL CAFETERIA COUNTER

customer's average mouth heights on a line perpendicular to the horizontal edge of the tray slide

exposed edges of glass shelves or shields shall have a safety edge of parent material and be trimmed with channels

food shields are to intercept the direct line between the customer's mouth and the food being displayed and to minimize contamination by the customer

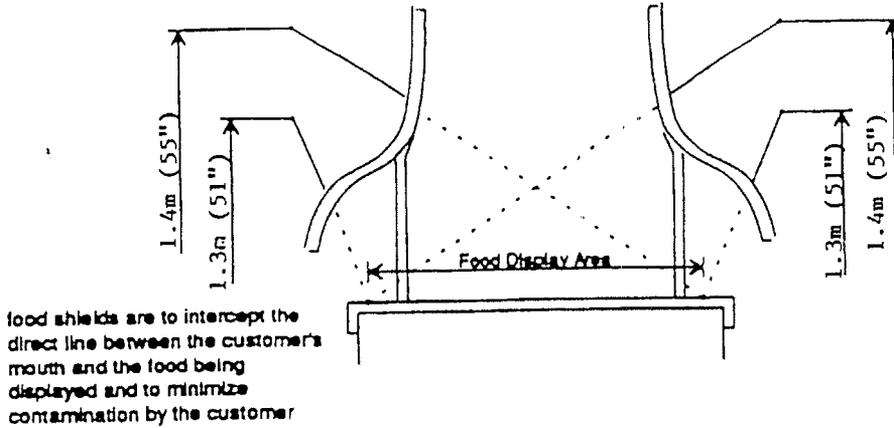

FOOD SHIELDS

Grades 6-8

TYPICAL BUFFET TABLE

customer's average mouth heights on a line perpendicular to the horizontal edge of the buffet table

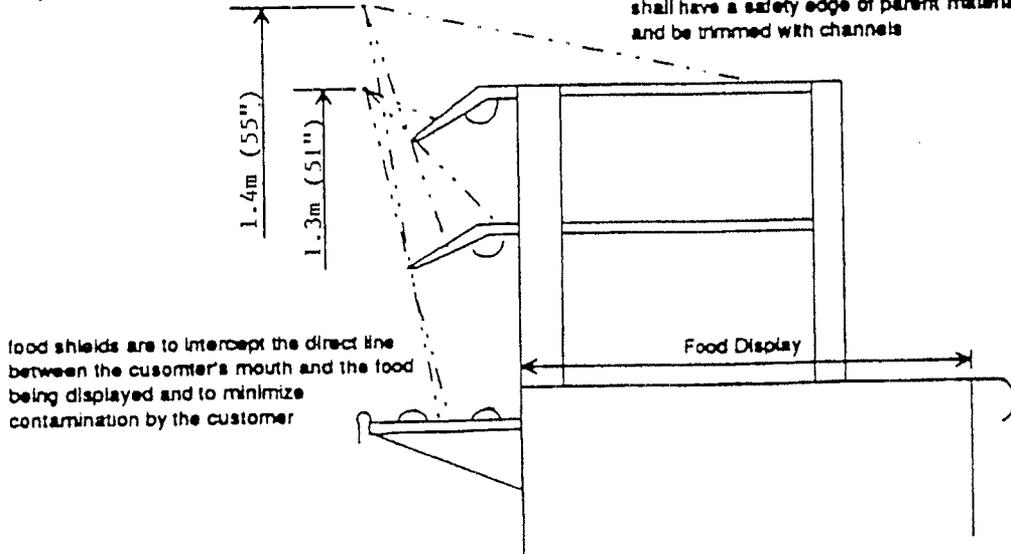

exposed edges of glass shelves or shields shall have a safety edge of parent material and be trimmed with channels

TYPICAL CAFETERIA COUNTER

customer's average mouth heights on a line perpendicular to the horizontal edge of the tray slide
